### Sky Software

Integrated Cloud based administration of Tax, Time, Debtors and Company Secretarial for accounting firms. Data between various disciplines is fully integrated and shared. **Unlimited user licence** which is cost effective for the whole firm as well as **free webinars** for your whole firm saving substantial amounts.

### Risk Aversion

Sky Tax generates all your firms communications with your clients. It's a breeze, send your client the mandate required to sign and the disclaimer for provisional tax and tax returns filing automatically which can be signed by digital signature and returned automatically to document storage in the system.

There is no duplication of the integrated data.

### Sticky Notes or CRM

With Sky you don't need to acquire an additional CRM system as CRM is standard within the system. All your CRM notices are controlled and tracked. SKY also provides transactional document management. Store documents against transactions. SKY is paperless. The system stores all the notices from SARS and alerts the user.

### Auto Assessments

Sky Tax will handle your auto assessments perfectly managing tracking and controlling allowing you to handle a correction or not.

### Sky Tax

Sky Tax prepares and processes all aspects of tax return calculations, submissions and receives all SARS notices. The fastest tax production system in RSA. Make use of our Digital Signatures to get your clients to sign returns. Files ITR12, ITRTrusts, ITR14 and Vat. Sky Tax is paperless with built in CRM.

### Sky Tax One Screen Approach

Accfin's Sky Tax uses a one screen approach that handles every aspect of IRP6s making it so easy;-

- Retrieve all the IRP6 data from SARS e-filing in bulk.
- Run calculations and check for differences - your records with SARS.
- Communicate with clients who can confirm filings by digital signature.
- File individually or in bulk.
- Track and control with Sky Tax's unique CRM system.

### Estimated Calc

Sky Tax links the provisional tax estimate with the last tax return source codes which will help the Tax Practitioner make a more considered opinion. This helps compare what happened last year with this years estimated payment. [Click here](#) to see the screen.

REAL TIME  
TIME IS MONEY

## Sky Time

Time management is the most critical aspect of any accounting firm. Manage your employees time effectively, track productivity, overtime, leave, etc in real time. Capture Timesheets in calendar mode. Managing the time charge right through to the invoice and statement. Change your firms financial profile by making use of this system.

## Sky Debtors

No month-end hangup, move into the **new month quickly**. In fact one can start the new month without finalising the old month. Send your statements out by the 1st of every month! Sky Time is fully integrated with all the other Sky modules and also includes a full scale multi book Debtors system which can run unlimited multiple debtors books. Automatically produce invoices from Sky Tax and Sky Secretarial!

## Scalable Time System

*Sky Time is the next generation enterprise wide Time Sheet system for accounting firms as well as a full state of the art debtors system. Sky Time will handle time from the smallest firm right through to multinational firms. It does not matter whether you have 10 employees or 10,000. Its scalable, meaning that a firm can start from the smallest and grow into the largest. There is no limit on the number of time-sheet employees you can have. Whats more Sky runs in the cloud with very little setup required. Our new licensing model makes it affordable to meet all size firms requirements.*

New Season 2022 with Sky Sec

### Sky Secretarial

Sky Sec works on the basis that you perform a transaction by entering data into the transaction database and all the necessary documentation is produced in the required format. The system will perform a multitude of different transaction types under cover of one transaction, from a simple appoint or resign of a director to more complicated share and share buyback transactions in minutes.

### Risk Aversion

Sky Sec standout features are the generation of the compliance check list, tracking and control of annual returns and standard resolutions and minutes.

### Sky Sec 1st in RSA

Sky Sec has been instrumental in innovating the company secretarial industry. Accfin was the first company to produce copyrighted statutory forms and electronic registers. Sky Sec is companies act compliant.

Very simply Sky Sec is a software program that allows a Company Secretary or Company Secretarial Practitioner to perform company secretarial transactions that produces all the necessary statutory documentation and all statutory registers.

Manage your annual returns process effectively and productively. Track by return month and have instant access to previous returns.
